

Immigrants and Riots. French Style Alien Riots to Spread to California

Topic: illegal immigration alien riots crimes

I live in California; a state that has a huge number of legal and illegal aliens. According to one web source, California has 40% of all illegals in America (with approximately 41% of those settling in the L.A. area). That is approximately 3 million people with that number being added to by, a conservatively estimated, 300,000 per year.

Another web source advised that California spends between 9 and 10.5 billion dollars per year just for the schooling of the children of illegals and for keeping incarcerated (convicted) illegals, and for uncompensated health care. Predictably, this socialist mentality by our courts and leaders has lead to a conclusion that can be reached by anyone with an understanding of 4th grade math -- California is bankrupt.

Now a scary report; according to another source, "Some of the most violent criminals at large today are illegal aliens". Let's take a moment to point out the fact that the loony liberals have insured that these poor misunderstood criminals cannot be profiled and checked for immigration status. Even a person who is known to be in felonious violation of immigration law can not be stopped and arrested by local law enforcement.

Now consider the epidemic of sex crimes in northern California that are being perpetrated by 'spanics' and Mexicans. Then consider that most of these violent criminals are gang members. There are, not thousands, but tens of thousands of armed and demonstrably violent street gang members loosed upon the people of our state. Since they have the money and resources for buying arms, many of these have the local police departments out-gunned. How's that for a comforting thought?

Also, it is hardly a secret that the Hispanics control the drug trafficking in this state. Not surprisingly, some of the illegals pay off their 'transportation costs' for getting into this country by selling drugs. The trade is so lucrative that many just stay in the business of selling death to our people. It isn't possible to find an exact number who are doing this but they are as present as cockroaches in a slum.

Here's my point...

What's going to happen when the welfare tap is turned off and there's no more free lunch for the illegals? What will happen when "we the people" are tired of being raped,

murdered, robbed, by illegals and are tired of being taken advantage of by politicians who are allowing it?

For an answer, I think it's reasonable to look at what's happening in France. The immigrants there (and we're talking 'legal' immigrants at that!) are rioting in the streets and burning everything that's within reach of a match. Of note is that law enforcement is standing by and doing absolutely nothing to protect anyone's property or personal safety. There were token arrests but no one was protected. Does this sound familiar? When there was rioting in Detroit in '67, Cleveland in '66, Watts '65, L.A. '92, and most recently, in Toledo, OH, no one's property and no one's personal safety was at any time protected by law enforcement. People died and people were injured (some critically).

The point should be painfully clear: the police will not protect us during a riot (nor are they required to). That simply means that the monetary damage for the coming riots will be staggering. And, who knows how many innocent people will be injured or killed?

Please spare me any bleeding heart liberalism by pointing out that many of the illegals are hard working people who are just trying to improve their standard of living. They have no desire to riot. Let me address this by first saying that I've personally seen the squalor in Juarez and Baja, Mexico and have been deeply moved by it.

Also, I didn't say that I blamed anyone for desiring a better life. However, it should be understood that the rioting won't involve all of the illegals. But let's don't stick our heads in the sand here. There will be rioting and rioting always brings with it a mob mentality. People who ordinarily wouldn't riot will be caught up in the matter and will be a part of the overall dynamic. Some of these hard workers will be torch carriers.

The bottom line is that we will need to be prepared to protect ourselves. That includes protecting ourselves from the Democrats (sic) and any other such infestation of liberal Anti-Americans who insist on the defeating and overthrowing of we the people at any cost.

Included in this house cleaning should be any so-called Republicans/conservatives who stand idly by while the liberals run roughshod over us and strip us of our inalienable rights. We must give diligence to take whatever steps to rid ourselves of leadership who disallow self-protection and preservation and who have little regard for the gravity of the violation of our women by brutal thugs. We voted them in and we can vote them out. This way, in case we cannot prevent rioting, we can at least be prepared to defend ourselves and do so lawfully and legally.

I end with this comment by a witness to the LA riots in 1992. She noted that there were armed Korean store owners defending their property. She says this: "I thought, 'Where are the police? Why are these store owners having to protect their own property with guns?'. Where, indeed.
