

CONGRESSMAN RON PAUL: 'North American Union is bellwether for world government'

Saturday, July 15, 2006

"I think the goal is one world government - we have not only the U.N. - we have the WTO, the IMF, the World Bank, then we have all the subsidiaries like NAFTA and hemispheric governments, highways coming in."

Above quote by Congressman Ron Paul

Congressman Ron Paul is a conservative Republican from the State of Texas. He is also one of the few Christian Patriots who votes the way that he should to preserve our Constitutional Republic. When he says that we need to impeach George Bush, please listen to him! It is YOU who are allowing George Bush to steer our country into a Fascist so-called "Democracy".

Ron Paul: Impeach Bush

'North American Union is bellwether for world government'

News Wire: Republican Congressman Ron Paul says **President Bush has presided over a doctrine of violating the Constitution at every turn and that he should be impeached.** He says that Bush should be impeached not under the umbrella of partisan vengeance but **for ceaselessly breaking the laws of the land.**

Rep. Congressman: Impeach Bush For Violating Constitution -
Not Partisan Payback

Says North American Union is bellwether for world government

By Alex Jones / PrisonPlanet.com

Republican Congressman Ron Paul says President Bush has presided over a doctrine of violating the Constitution at every turn and that he should be impeached - but that likely Democratic efforts to do so will be in the interests of playing politics and not the health of the nation.

During an interview with Alex Jones on the GCN Radio network, Paul outlined the likely scenario as to how impeachment proceedings would unfold.

"I'd be surprised if they win both - I think they're going to win one body and if they win the House right now they do not say they would have an impeachment but I think the way that place operates I think they probably will make every effort," said Paul.

"If they happened to have a ten or fifteen vote margin that would be a political thing - it would be payback time."

Paul said that Bush should be impeached not under the umbrella of partisan vengeance but for ceaselessly breaking the laws of the land.

"I would have trouble arguing that he's been a Constitutional President and once you violate the Constitution and be proven to do that I think these people should be removed from office."

Opining that **the US had entered a period of "soft fascism,"** Paul noted that **the legacy of the Bush administration has been the total abandonment of Constitutional principles.**

"Congress has generously ignored the Constitution while the President flaunts it,

the courts have ignored it and they get in the business of legislating so there's no respect for the rule of law." said Paul.

"When the Presidents signs all these bills and then adds statements after saying I have no intention of following it - he's in a way signing it and vetoing - so in his mind he's vetoing a lot of bills, in our mind under the rule of law he hasn't vetoed a thing."

Asked what **the ultimate agenda was behind the American Union and the push on behalf of the Bush administration to homogenize the US with Mexico and Canada,** Paul was clear in his response.

"I think the goal is one world government - we have not only the U.N. - we have the WTO, the IMF, the World Bank, then we have all the subsidiaries like NAFTA and hemispheric governments, highways coming in."

"I just hope and pray that we can wake up enough people," said Paul, noting that Texans in his own backyard were more aware of Bush selling out the country for an American Union than anyone in Washington.
